NASA GUIDEBOOK FOR PROPOSERS, JANUARY 2015

2.3.8 Current and Pending Support [Ref.: Appendix B, Part (c)(10)]

Specifically, for the PI and any Co-Is who are proposed to perform a significant share (>10%) of the proposed work, provide the following information:

• Title of award or project title;

• Name of PI on award;

• Program name (if appropriate) and sponsoring agency or organization, including a point of contact with his/her telephone number and email address;

• Performance period;

• Total amount received by that investigator (including indirect costs) or the amount per year if uniform (e.g., $50 k/year); and

• Commitment by PI or Co-I in terms of person-months per year for each year.

For pending research proposals involving substantially the same kind of research as that being proposed to NASA in this proposal, the proposing PI must notify the NASA Program Officer identified for the NRA immediately of any successful proposals that are awarded any time after the proposal due date and until the time that NASA’s selections are announced.

B&P NOTES:
Based on internal discussions and exchanges with NASA, the following B&P guidance should be applied by all NCAR labs and programs when completing Current and Pending forms for NASA.

To address the requirement that the C&P include the “amount received by that investigator,” NCAR will now include the total, loaded salary requested for that investigator.

Additionally, each C&P submitted to NASA will include a footnote explaining this interpretation. (The requirement from the NASA Guidebook regarding "total amount requested by that investigator" has been interpreted to include the costs of salary, benefits, and associated indirect costs requested for that investigator for the entire project.)
To simplify this, you don’t need to calculate the actual, loaded salary of a given individual. Valerie has done several test cases, and determined that NCAR’s fringe benefits and associated indirects (including CSCs, if applicable) can be estimated by multiplying the salary requested by the number 2.53.

Please note: We cannot control what subawardees provide, and they will have their own interpretations of the guidance.

If an investigator is (only) co-sponsoring time, then the total amount on the C&P will be zero.

Please see the following page for examples.

**Investigator:**

**Project Title:** Pine Trees and Other Sap Producers

**NCAR Proposal #:** 2012-1798

**Source of Support:** Dell Computing

**Proposal Start Date:** 1/1/2012

**Proposal End Date:** 12/31/2016

**Program Name:** Dell for You

**Program No:** xyzPdq

**Proposal Manager:** Dr. Peter Pan

**Prog Mgr Phone:** 912-555-1270

**Prog Mgr Email:** ppan@dell.com

**Total Award Amount to this investigator:** $158,889
