The NCAR Advanced Study Program at the National Center for Atmospheric Research in Boulder, Colorado, provides opportunities for educational and professional development for graduate students, postdocs, and early career scientists and engineers, and research sabbaticals for faculty.

OPPORTUNITIES

ASP provides early career researchers and engineers with access to NCAR’s world-class research, engineering, and computing facilities with the goal of promoting the advancement of science and innovation, especially in emerging areas of the geosciences.

- **Postdoctoral Fellowship Program.** ASP hires up to ten new postdocs each year to work at NCAR on self-directed research with mentorship. In addition to a competitive salary, ASP fellows receive a travel budget and funding required to conduct research. *Application deadline: early January each year.*

- **Graduate Visitor Program.** We sponsor 3- to 12-month visits to NCAR for graduate students in pursuit of thesis research in science and engineering with mentor- ship. Support is also available for one to two faculty advisor visits. *Application deadline: October 31 each year.*

- **Faculty Fellowship Program.** We provide opportunities and resources for research sabbaticals for faculty to work in residence at NCAR. *Application deadline: December 23, 2016.*

- **ASP Summer Colloquia.** These two-week workshops for 25 graduate students highlight a cutting edge topic or emerging area of science. Topics and scientific organizers change each year. *Registration opens in January.*
